

## Borescope News

Across a range of sectors, the tiniest and most recent ViewTech video borescope, the **VJ-4 1.1mm**, is used to examine inaccessible application areas.

The flexible, non-articulating, microscopic VJ-4 1.1mm video borescope is ideal for inspection processes in manufacturing and aerospace because it can capture and document areas that are invisible to the human eye with crisp images and videos.

The most recent use for VJ-4 1.1mm involved **cannulated screw** quality inspections. Now, a surgical treatment technology leader uses the VJ-4 1.1m to examine the hollowed inside of these medical devices, which orthopedic surgeons use as fixing methods.
